

seldom seen. The only clue to their presence might be a footprint left on a muddy track, a scat deposited on a rocky ledge, or bones scattered on a forest floor. In Tracks, Scats and Other Traces, Barbara Triggs provides all information needed to identify mammals anywhere in Australia, using only the tracks or other signs they leave behind.

Cost: \$39.95. Member's price: \$36.50

Wildlife of Tropical North Queensland

Tropical North Queensland is one of the world's most beautiful natural areas. Each year, thousands of visitors, from across Australia and overseas, are drawn to the region to experience for themselves the lure of its spectacular landscapes and astonishing wildlife. This full colour identification guide covers the area east of the Great Dividing Range between Cooktown and Mackay (including Cairns and Townsville), and is the first comprehensive publication on the animals of Tropical North Queensland. Easy-to-read information on more than 850 species and 950 colour photographs make it an essential handbook for residents and visitors alike.

Cost: \$32.90. Member's price: \$30.00

Rainforest Trees and Shrubs: a field guide to their identification by Gwen Harden,

Plants of Mossman Gorge

CONIFERS & ALLIES

Araucariaceae

Agathis robusta

Queensland Kauri Pine

Stangeriaceae

Bowenia spectabilis

Bowenia or Zamia Fern

Zamiaceae

Lepidozamia hopei

Zamia Palm or Hope's Cycad

FERNS & ALLIES

Adiantaceae

Adiantum diaphanum

Filmy Maidenhair Fern

Angiopteridaceae

Angiopteris evecta

King Fern

Aspleniaceae

Asplenium australasicum
Asplenium lasperitiifolium
Asplenium nidus
Asplenium simplicifrons

Bird's Nest Fern
Johnstone River Maidenhair
Birds Nest Fern
Narrow Bird's Nest Fern

Blechnaceae

Blechnum cartilaginum

Gristle Fern

Cyatheaceae

Cyathea cooperi

Scaly Tree Fern

Hymenophyllaceae

Crepidomanes bipunctatum

Bill McDonald and John Williams

This > 300 page field guide is the successor to Trees and Shrubs in Rainforest > of New South Wales and southern Queensland (Williams, Harden & McDonald 1984), which was known by many as the 'Red Book' and widely used by professional botanists and rainforest enthusiasts alike. This book has been rewritten and updated with additional species, while keeping the essentials of the original format and will enable the identification of rainforest trees and shrubs of Victoria, NSW and subtropical Queensland using vegetative features. It has been brought up to date with additional species and more comprehensive information. The book includes descriptions of 850 species (an increase of 309 from the 'Red Book'), each with leaf and fruit drawings.

Cost: \$50. Member's price: \$46.00.

If you have any book reviews, pictures, notes on growing tropical Australian plants or trip reports you'd like published in this newsletter, please send them to me: Stuart Worboys – email worboys1968@yahoo.com.au
